Message from the President (2022-2023)

Dear CAPA colleagues:

Greetings! I hope everyone is in good health and good spirits as we are heading into this Holiday season. There are so many people I need to thank and so many achievements I want to recognize within our CAPA community at different levels, from personal, group, to organizational level.

Since our last CAPA eNewsletter, many great things have happened, are happening now, and will happen in the next couple of months. The successful launch and smooth operation of all proposed programs are thanks to the collective and collaborative efforts from the EC, BOD, Education committee and its subcommittees, Membership committee, IT subcommittee, and many other committees. I would like to share them with you:

(Cont'd on Page 2)

Message from the President (2022-2023)

(Cont'd from Page 1)

1. Routine and previously established programs:

A. The weekly Online Pathology Course continues to do well with the completion of thoracic and head and neck pathology.

B. The monthly special lecture series in LPWFD program had an excellent additional lecture: The American Board of Pathology: Past, Present, and a Bright and Bold Future by Dr. Gary Procop, the Chief Executive Officer of the American Board of Pathology.

C. We successfully held the 8th CAPA Diagnostic Pathology Course in September and for the first time, a maximum of 17 AMA PRA Category 1 credits was offered through the College of American Pathologists (CAP). As of this date, a total of 240 attendees have claimed CMEs for this wonderful educational course.

D. CAPA companion meeting at ASC 2022 held on 11/09/2022 was also a success. The companion meeting was very well attended and had a great Q/A session.

2. Newly established program(s):

A. The monthly subspecialty pathology course for pathologists in China, a joint program between the Pathology Center of Excellence, Zhejiang University School of Medicine and CAPA, had a symposium on breast pathology on 11/27/2022 and a symposium on neuro-oncological pathology on 12/15/2022.

B. CAPA members Drs. Xiaohua Qian, Shi Wei, Charles Guo, Steven Shen, Zuhua Gao presented at the 2022 Guangdong-Hong Kong-Macau-United States Pathology Summit held on 09/16/2022. They brought their in-depth knowledge and shared their expertise on soft tissue tumor, bone tumor, prostate cancer, renal cancer and gastrointestinal non-neoplastic diseases. All lectures were well-received by the audience.

3. Upcoming programs:

A. The first CAPA companion meeting at USCAP 2023 will take place in New Orleans on March 12th. The excellent work and diplomacy of Drs. Xiaoxian Li, Marilyn Bui, and Zaibo Li led to the establishment of CAPA companion society status in USCAP for the first time. This has been a dream of many CAPA members for decades. Let's give a round of loud applause to celebrate this historic moment and thank all CAPA leaders, members, and this CAPA dream team for making this dream come true.

B. We are currently working on five CAPA symposiums at the Asian Pacific International Academy of Pathology (AP-IAP) 2023 meeting. This effort is led by Dr. Linsheng Zhang of the Education Committee, Dr. Huamin Wang of the International Collaboration Committee, and a working group. The titles of these 5 programs are 2022 WHO Updates in Urinary and Male Genital Tumors, Emerging Entities and Updates of Lymphoid Neoplasia, What's New in Endocrine, Head and Neck Pathology, Updates on Pediatric, Placental Pathology and Gynecologic Pathology, and Pattern-Based Approaches to non-Neoplastic Liver, Lung, and Kidney Diseases. In addition, the very first Pancreaticobiliary Pathology Society-CAPA joint symposium will be launched at this meeting.

(Cont'd on Page 3)

Message from the President (2022-2023)

(Cont'd from Page 2)

All of these educational activities are made possible by CAPA members: committee and subcommittee members, EC members and their volunteering work, and guidance from the BOD. I am very grateful for each of your efforts in helping me reach this year's goals.

CAPA's current finances remain stable and healthy thanks to the continued support from our sponsors. The CAPA 2022 fall fundraising campaign was a success thanks to many CAPA members and their personal donations which are listed in this newsletter.

As we move into next year, we have two elections that need to be conducted by early January. The general election for CAPA BOD has four vacancies and the BOD will elect the CAPA President of 2023. The Election Committee chaired by Dr. Chen Zhou is taking charge of this task. I sincerely and strongly encourage CAPA members to actively enter the race, run for CAPA BOD, and serve CAPA as leaders or voice your opinion and cast your vote. With your engagement, CAPA will continuously grow and accomplish its stated mission: Excellence through Education, Professionalism and Connection!

Please use a few minutes to review the details of recently completed CAPA's educational activities, achievements of CAPA members, our sponsor list, and personal donations of CAPA members in this newsletter. Let's all cheer for and thank them.

Merry Christmas and Happy New Year!

Xiuli Liu, MD, PhD
President of CAPA, year 2022-2023

RE: 2023 CAPA President Election

December 19, 2022

Dear CAPA Members:

Thank you very much for your nomination. The CAPA Election Committee is pleased to announce two (2) qualified candidates for the President of the year 2023-2024.

Per CAPA bylaws, the election of the CAPA President will be conducted by the current BOD at the same time as the election of the Board of Directors (BOD), and the result will be announced by the BOD when available.

Thank you in advance for your participation in the 2023 CAPA election.

CAPA Election Committee

List of candidates for President

Shaoxiong Chen (陈少雄), MD, PhD

Haodong Xu (徐浩东), MD, PhD

(Cont'd on Page 5)

(Cont'd from Page 4)

Candidate for CAPA President

Shaoxiong Chen (陈少雄), MD, PhD **Indiana University**

Shaoxiong Chen received his Doctor of Medicine (MD) from Tongji Medical University in 1987 and Ph.D. in Biochemistry and Molecular Biology at Tulane University in 1998. Subsequently he pursued his post-doctoral fellowship training in cancer biology at UCLA. Later he finished his pathology residency training at The University of Toledo (2005-2009), surgical pathology fellowship training at MD Anderson (2009-2010) and cytopathology training at Indiana University (2010-2011). Shaoxiong Chen is board certified in surgical pathology and cytology.

Currently Shaoxiong Chen is an associate professor at Department of Pathology at Indiana University School of Medicine. His clinical interest includes bone/soft tissue and cytopathology. He has published 52 peer reviewed articles and wrote 3 book chapters including synovial sarcoma section (WHO Pathology and Genetics: Tumours of the Urinary System and Male Genital System, 5th edition, IARC, Lyon, 2022). Teaching is a part of his effort as an academic faculty. He has been actively involved in giving didactic lectures to residents, fellows and medical students and giving presentation within local, national and international professional organizations, including Indiana Association of Pathologists, CAPA, and CSP (Chinese Society of Pathologists). His USCAP interactive microscopy (IM) soft tissue course has been accepted by USCAP IM education committee and will begin a two-year term at the 2024 Annual Meeting in Baltimore, MD.

At the state level, Shaoxiong Chen was appointed as a CME chairman of Indiana Association of Pathologists (IAP) from 2015 to 2017. At least 9 hours/year of continuing medical education has been offered through IAP each year. Nationally and internationally well-known pathology experts in different subspecialties have been invited to give talks. Under his leadership of CME, IAP offered SAM credits to the participants for the first time in the history of IAP. His efforts included the launching of “Case of Month” at IAP website in 2014 and improvement of the quality of continuing medical education events. Later he was the president of IAP (2019-2020) and played a pivotal role in restructuring and reorganizing the association in line with the future needs.

Shaoxiong Chen is dedicated to serving CAPA. He has become a lifetime CAPA member and actively involved in CAPA activities. As an award committee member (2018 to 2019), a co-chair (March 2019 to Feb 2020) and a chair (March 2020 to Feb 2021) of award committee, he has been actively participating in the selection of candidates for CAPA Go-Path Award and CAPA Motic Award. From March 2021 to Feb 2022, he served the chair of CAPA education committee, added 9 additional education subcommittees by working with CAPA president, Marilyn and organized multiple educational meetings/courses. On March 19, 2022, he was given CAPA Zu-Hua Gao Outstanding Service Award. From March 2020 to Feb 2022, he was also a CAPA BOD member and worked together with other BOD members to serve CAPA. Shaoxiong Chen would like to continue his participation in CAPA various activities and try his best to make CAPA an outstanding pathology organization in the future.

(Cont'd from Page 5)

Candidate for CAPA President

Haodong Xu (徐浩东), MD, PhD

Dr. Haodong Xu graduated from Suzhou Medical College in 1987 and obtained MS and PhD degrees in 1990 and 1993, respectively. He spent 5 years studying molecular correlation with functional cardiac K⁺ channels as a postdoctoral fellow, and 4 years in residency training at the Washington University School of Medicine in St. Louis. He did one year of fellowship training in Pulmonary and Mediastinal Pathology at the Armed Forces Institute of Pathology. In July 2004, he began his job as an Assistant Professor at the University of Rochester Medical Center (URMC), and was promoted to Associate Professor in 2007, then Full Professor in 2011. He was recruited by UCLA as Professor-in-Residency in August 2013 where he was the section chief of Head and Neck pathology. He was recruited by University of Washington Medical Center (UWMC) as Professor with tenure and Director of Cardiovascular Pathology, Head and Neck Pathology and Lung Pathology in July 2017. He established an ACGME-accredited Cardiovascular and Pulmonary Fellowship Training Program in 2019 and he has been mentoring two fellows as a program director. He serves Histopathology and Biorepository Core in the Fred Hutchinson Cancer Research Center Lung SPORE as a director. He received individual teaching awards in URMC, UCLA and UWMC, and CPAP distinguished pathologist award. He is an editorial board member for Human Pathology, AIMM, Cardiovascular Innovations and Applications, among others. He has accepted an offer as Anatomic Pathology Director and Professor with tenure at the Wake Forest University School of Medicine, effective date 2/20/2023.

He has been pursuing translational cancer and basic cardiovascular research. His lab has been focusing on the study of mechanisms of cardiac arrhythmias for many years. They discovered that activation of p90 ribosomal S6 kinase elevated in the ischemic and diabetic cardiomyopathy prolongs cardiac repolarization through phosphorylating voltage-gated outward K⁺ channels. They first reported that ischemia-induced enhancement of FoxO1, beta-catenin/TCF4, and EZH2, one of epigenetic modulators signaling suppress the expression of NaV1.5 underlying functional cardiac Na⁺ channel activity. His research program has been supported by NIH KO8, RO1 and R56 grants, and AHA GIA award and TPA. Their translational and basic research findings have been published in journals including Modern Pathology, Human Pathology, Circulation Research, Free Radical Biology and Medicine, Heart Rhythm, among others.

He has been actively joining the CAPA activities as a lifetime member. He served the CAPA as secretary (March 2011 - March 2013) and vice president (March 2012-March 2013), and BOD as a member (March 2019-March 2021). He served the bylaw committee and joined the revision of the bylaw. He has frequently given lectures in the meetings organized by CAPA. He is President of Seattle Chapter, Society of Chinese Bioscientists in American (2020-present).

2023 CAPA Board of Directors Election

RE: 2023 CAPA BOD Election

December 19, 2022

Dear CAPA Members:

Thank you very much for your nomination. The CAPA Election Committee is pleased to announce that among seven (7) nominated candidates, five (5) candidates are determined to be qualified candidates per CAPA bylaws to fill four (4) positions on the Board of Directors (BOD) for the year 2023-2025.

The election will be held from Friday, January 6, 2023, at 12:00 pm (noon) EST to Sunday, January 8, 2023, at 12:00 pm (noon) EST.

Thank you in advance for your participation in the 2023 CAPA election.

CAPA Election Committee

2022 CAPA Board of Directors Election

Xiaoying Liu (刘晓英), MD, MSc

Gang Wang (王罡), MD, PhD, FRCPC

Xiu Yang (杨秀), MD, PhD

Helen Zhang (张宇), MD

Wei Zhang (张巍), MD, PhD

(Cont'd on Page 8)

Candidate for Board of Directors

(Cont'd from Page 7)

Xiaoying Liu (刘晓英), MD, MSc

Dr. Xiaoying Liu is an associate professor at the Geisel School of Medicine at Dartmouth College and senior faculty member in the Department of Pathology and Lab Medicine at the Dartmouth-Hitchcock Medical Center (DHMC). She is the medical director of the laboratory at Cottage Hospital and the president of the New Hampshire Society of Pathologists.

Dr. Liu completed AP and CP training in 2008 and Cytopathology fellowship in 2009 at the University of Kansas Medical Center. She joined the Department of Pathology and Lab Medicine at the DHMC in 2009. She is board-certified in Anatomic/Clinical Pathology and Cytopathology. Her practice and academic interests are cytopathology, fine needle aspiration, telecytopathology, and GI pathology. Dr. Liu has published over 60 peer-reviewed articles and book chapters. Her major research interests are in thyroid and pancreatic cancers as well as deep learning in cytology and histology. She has served on multiple national society committees, including Cytopathology Committee at the American society of Clinical Pathology (ASCP), Case Study Committee at the American Society of Cytopathology (ASC), Scientific Program Committee of ASC, and Education Committee at the Digital Pathology Association (DPA).

Dr. Liu has been an active member of CAPA. Currently she serves as the Chair of Cytopathology Subcommittee of CAPA. She has also served on multiple CAPA committees, including Education Committee, Industry Relations Committee, Pathology Informatics Digital Pathology Committee, and Annual CAPA Diagnostic Course Organizing Committee. Dr. Liu helped to organize the 8th Annual CAPA Diagnostic Course and served as the moderator for the Theme Session # 6 (Cytopathology). She has been actively involved in planning and organizing the CAPA Companion Symposium at the 13th ASIA PACIFIC International Academy of Pathology CONGRESS 2023 and will serve as the moderator for the session in Endocrine, Head and Neck Pathology. Dr. Liu has also given talks on Pancreas/Liver/GI cytology on the CAPA Online Education Program Pathology Lectures Series. In addition, she has given various lectures on cytopathology locally, nationally, and internationally.

Dr. Liu believes that CAPA is a robust society, which has provided various excellent education platforms to pathologists, pathology trainees and fellows. Dr. Liu is very passionate about furthering the CAPA strategic goals on educations, and collaborations with other pathology societies. She would like to apply to become a CAPA BOD member and she hopes to serve the CAPA members by listening to their thoughts, ideas and concerns. By working together with CAPA, she hopes to make this society stronger and better.

(Cont'd on Page 9)

Candidate for Board of Directors

(Cont'd from Page 8)

Gang Wang (王罡), MD, PhD, FRCPC

Dr. Wang received his MD degree from Tongji Medical University (Wuhan, China) and his Ph.D. in Pathology from the University of British Columbia (Vancouver, Canada). After completing his Anatomic Pathology residency at the University of British Columbia, he served as a Genitourinary Pathology fellow at the MD Anderson Cancer Center in Houston. After fellowship training, He joined the University of British Columbia faculty as a Clinical Assistant Professor and has worked as a consultant pathologist in BC Cancer Vancouver Center since 2017. Dr. Wang is currently the director of BC Cancer GU Tumor Bank, the director of Histology and Immunohistochemistry, and the Director of the David Hardwick Pathology Learning Centre at UBC.

Dr. Wang has a long-term research interest in genitourinary tumors, and his translational research is supported by Bladder Cancer Canada, University of British Columbia, and industry collaborative grants. He is the chapter author of "Urinary Bladder Pathology" and "Practical Cytopathology Frequently Asked Questions". Dr. Wang authored more than 60 peer-reviewed original articles. He was an invited speaker for the CAPA diagnostic course and online lecture series, The Canadian Anatomic & Molecular Pathology Conference (CAMP), Canadian Bladder Cancer Information System (CBCIS), and Huaxia Pathology Online Course. He is also the reviewer for more than 20 academic journals. He has been awarded the "New Faculty Research Award" from UBC Faculty of Medicine and the "Excellent in Research and Discovery Award" from UBC Department of Pathology. As an academic pathologist, Dr. Wang has trained more than 30 residents and fellows and served as mentors for many of them.

Dr. Wang has served Medical Staff Engagement Society (MSES) of the Provincial Health Services Authority (PHSA) and Priority and Evaluation Committee (PEC) of BC Cancer and is also an active member of the Chinese Canadian Medical Society (CCMS). He is a firm believer of CAPA and has been a lifetime member since 2016. Dr. Wang has a strong willingness to dedicate himself to CAPA and make it a mainstream professional organization representing and promoting the success of every Chinese pathologist in academic centers or private practice. Based on his clinical, academic, and administrative background, with his enthusiasm, Dr. Wang will be the best fit for CAPA BOD.

(Cont'd on Page 10)

Candidate for Board of Directors

(Cont'd from Page 9)

Xiu Yang (杨秀), MD, PhD

I am AP/CP and cytopathology Board certified pathologist. Currently I am a member of Ameripath Indiana (Quest), practicing at a few community- based hospitals.

I got my medical degree in China Medical University and continued my education in the same institute, department of pathology for master degree. After finishing my Ph.D at Case western Reserve University, department of Neuroscience, I matched to SUNY downstate as a AP/CP resident. After Cytopathology fellowship at Montifiore Medical Center affiliated to Albert Einstein University, I started my practice at University of Louisville, KY. I signed out all types of surgical and cytology cases, and served as director of head and neck/endocrine pathology. I also involved in training residents and cytology fellows and became the assistant fellowship director after one year. After working at UoL for more than 3 years, due to family reason, I joined AmeriPath indiana and started practice in community - based settings. My experience made me familiar with both academic and community practice settings, and understand the similarities and differences between the two.

I am a lifetime CAPA member and serve as a member of CAPA private practice committee. Over the years, I actively attended CAPA annual meetings and participated in online and in-person performances. The previous BOD members have done superb jobs to help CAPA members thrive in day to day work, academic research and professional developments. I deeply appreciate their efforts. Therefore, I hope to dedicate myself to CAPA and help promote the success of every CAPA member in various settings.

(Cont'd on Page 11)

(Cont'd from Page 10)

Candidate for Board of Directors

Helen Zhang (张宇), MD

Dr. Zhang received her medical degree and Master of Medicine in Cardiology from Wenzhou Medical University. She completed her residency at Temple University Hospital in Philadelphia and followed by hematopathology fellowship at Houston Methodist Hospital and cytopathology fellowship at MD Anderson Cancer Center. After a short period of practice in a private group, Dr. Zhang joined Baylor College of Medicine and currently at The University of Texas Health Science Center at Houston as an assistant professor. Dr. Zhang plays an active role in residents' education. She was the recipient of 2022 Dean's Teaching Excellence Award at UT Houston McGovern Medical School for her excellent teaching. She is also actively involved in regional and national pathology committees including Texas Society of Pathologists, Papanicolaou Society of Cytopathology and American Society of Cytopathology.

Dr. Zhang is a long time CAPA member and actively involved in many CAPA activities. She is currently the Chair of CAPA Leadership, Professionalism, Wellness and Friendship Development Program, and has been organizing, hosting and moderating monthly online lecture series focusing on leadership skills, wellness, and professional growth (up to 21 sessions, involving 25 prominent speakers throughout the North America). Dr. Zhang was a speaker and a moderator at 2022 CAPA Annual Diagnostic Course. In addition, she serves on both cytopathology and hematopathology subcommittees. She was a recipient of 2021-2022 CAPA Service Award.

This year, Dr. Zhang established a new CAPA social media group "CAPA休闲娱乐群" with the help of other CAPA members to provide a platform for our CAPA members to share anything that can make us proud, and to foster a supportive community. Dr. Zhang is an active member of Duotou Wen-Gong-Tuan Performance Group (多头文工团) and performs regularly at CAPA Annual Meetings and Annual Diagnostic Courses.

If Dr. Zhang were to be elected, she will collaborate with BOD members, CAPA President and EC members to make CAPA stronger. Dr. Zhang has been an active interviewer for medical school student and pathology resident recruitment. This experience will allow her to help our trainees' fellowship application and job hunting. A healthy work-life balance is important for our well-being and quality of life. Dr. Zhang would like to be an advocate for our members' wellness.

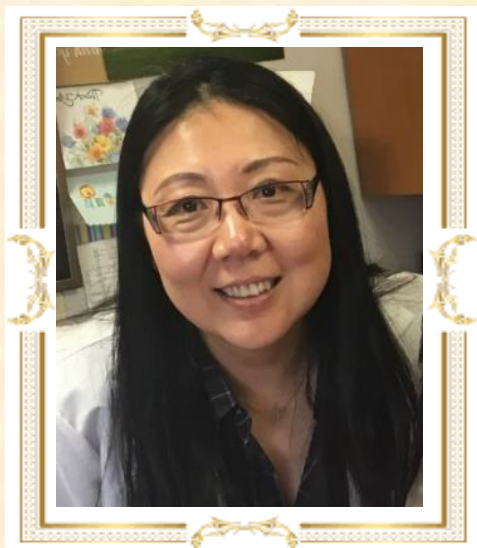

In summary, Dr. Zhang feels dearly that CAPA is our own organization. She devoted her time and effort and made significant contributions to CAPA in the past, now, and will continue to do so in the future. She is looking forward to the opportunity to serve CAPA as a member of Board of Directors.

(Cont'd on Page 12)

Candidate for Board of Directors

(Cont'd from Page 11)

Wei Zhang (张巍), MD, PhD

Dr. Wei Zhang received her medical degree from China Medical University in 1994. After graduation, she finished her Ophthalmology residency at China Medical University and went to Japan to pursue her Ph.D. in 1999. She was working as a research associate scientist at Yale University School of Medicine before starting her Pathology residency training. After AP/CP residency training at Mount Sinai St.-Luke's-Roosevelt Hospital, she completed her GI/Liver Pathology fellowship at Montefiore Medical Center and her Molecular Genetic Pathology fellowship at Mount Sinai Hospital in New York. She has been working as an assistant professor at the University of Wisconsin-Madison since 2019. She is currently the head of the GI/Liver service there. She is also involved in several institutional committees of the Hospital of the University of Wisconsin-Madison, including the Providers' wellness committee, Finance Committee, etc.

Dr. Zhang joined CAPA in 2015 when she was still a resident. Since then, she has been actively involved in many CAPA activities. She has been serving the membership committee since 2016. During this period, she has been helping the past chairs, Drs. Guoping Cai and Xin Han, on the membership application and annual meeting registration. She served as the co-chair in 2021 and currently is the chair of the CAPA membership committee. In these positions, she helped the education committee organize the 2021 and 2022 CAPA Annual Diagnostic Course and gave talks at both conferences. She received CAPA's service award in March 2022 for her contribution as the co-chair of the membership committee. Besides the membership committee, Dr. Zhang is also very actively involved in CAPA's Career development program and molecular pathology sub-committee.

Since Dr. Zhang joined CAPA in 2015, she felt strongly that CAPA is the organization to which she belongs. She has devoted her time and effort and made significant contributions to CAPA in the past years as CAPA membership committee co-chair and chair. If Dr. Zhang was to be elected, she will work closely with other BOD members and the president to further promote CAPA and our members in various pathology platforms. Dr. Zhang is determined to continue to serve CAPA and its members in the following years.
